

# PERSONAL LOG

Adhika Padhana Johan - 康世经  
Artificial Intelligence and Computer Science

## STAGE I

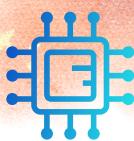

Time of Recording:  
15/09/2025 - 29/09/2025

### TOOLS USED:

15/09/2025

**What I did:** Explored a bit of the Lexue system, learned the basics of AI, the teachers opinion on various things including AGI ( Artificial General Intelligence ), and how the class worked.

**Details:** Did introduction, personal info form, and pre test in Lexue, listened to lectures generally about AI and computer programs.

17/09/2025

**What I did:** Installed VS Code and PyCharm and tried out some online IDEs like programiz

**Details:** Ended up not using VS Code for C and C++ and instead using an online IDE to quickly test out C/C++ programs, and PyCharm will be used for python

22/09/2025

**What I did:** Contributed to Rough Plan and the Master to-list

**Details:** Decided on using canva, looked at last year's projects for reference and used DeepSeek for some advice on what topics to discuss.

23/09/2025

**What I did:** Continued to contribute to Rough Plan, Master to-list, and tried to make a kahoot-style quiz website

**Details:** Used canva and researched more topics, Coded with HTML with CSS and JS built in to 1 .html file

28/09/2025

**What I did:** Continued project log and personal logs, Continued to try stuff out with html and added sound effects, studied how to use GitHub

**Details:** Made V2 and V3 of the .html website and added sound effect on right and wrong answers, tried to learn how to push code and files to github

28/09/2025

**What I did:** Submitting the personal logs to the CIO, and completed the project log

**Details:** finalizing the personal log, and sent the log to the CIO and contributed more to the project log.
